

Following the treacherous path of the kyu-arr code, you arrive at the entrance of a dark and ominous cave, the Witches' Cave in Argentina (do you miss traveling already my quarantine buddies T\_T).

Surely, an old and important secret is buried in the cavities of the cave.

Unfortunately, past visitors have significantly damaged the caves and venturing in too deep can be dangerous.

Your guide warns you that once you enter a cavity, you may no longer be able to exit from the same entrance o\_O.

Can you help the YRL staff find their way through this labyrinth by visiting all cavities and coming out safely? Remember, you can only travel forward!

Uncover the mystery of Borges' labyrinth and help the staff find the answer to constructing the Library of Babel.

A strange cryptic message was plastered near the entrance. What could it mean? Is it a cipher or perhaps a key to something very important...

\* you carry a flashlight to combat the darkness

it's pitch black but luckily you're carrying your flashlight.  
there's something written on the walls...
